

Müller-BBM is a leading engineering company with more than 250 employees who provide consulting services in the areas of acoustics, vibration control, building physics and air quality control, among others, for an international customer base.

Our Active Methods Group plans, develops and realizes active systems for noise and vibration control and for active sound design for a broad customer and application base. To further strengthen this group in our head office in Planegg near Munich, we are looking for

Software developers [m/f] **Signal processing DSP / Embedded** **Windows Application Development**

Your task is to develop software that turns the acoustic expertise of our consulting engineers into a wide array of special products, ranging from car sounds to concert halls. In this function you are involved in the entire system and software development process up to installing and setting up the systems for operation. Occasionally you will be working directly at the customer's site.

You are qualified for these challenging positions through completed university studies or a comparable qualification. You have gathered experience with software development methods, processes and tools and have a good command of English and a solid working knowledge of German or are willing to acquire the necessary skills for working in a German environment. Apart from MS-Office, you are familiar with mathematical software such as Matlab.

For the position in the area of **signal processing**, sound knowledge of C, C++, DSP-Assembler, QNX, Eclipse and audio signal processing in real time is indispensable, knowledge of software development in the field of automotive would be a valuable asset.

For the position in the area of **application development**, knowledge of C++, C#, SQL and .NET. is required, experience in the conception and design of intuitive user interfaces is welcome.

We offer you the possibility of becoming active in direct contact with our customers with a high level of independence and personal responsibility. A pleasant working environment in a company with team spirit, an extraordinary employee participation plan, attractive conditions and good social benefits such as a company pension plan and profit sharing are waiting for you.

Does one of these responsible and varied tasks appeal to you? If so, we look forward to receiving your application documents including CV, certificates and your desired salary by email.
